## 1 Scope of Delivery

The purpose of this Contract is to enable the Royal Norwegian Air Force to conduct necessary maintenance of its MH-60R Seahawk helicopters in a safe and efficient manner at its own locations.

This Annex specifies the Scope of Delivery.

## 2 Materiel

Materiel included in the delivery is customised Work stands for MH-60R Seahawk in the variants, configurations and quantities as specified below, delivered as specified in Annex C.

| Model/Configuration | Description/use            | Quantity | Optional Quantity |
|---------------------|----------------------------|----------|-------------------|
| Model 1             | Line maintenance           | 3        | 1                 |
| Model 2             | Phase/Calendar maintenance | 2        | 1                 |
| Model 3             | Depot maintenance          | 2        | 1                 |

For detailed specifications reference is made to Annex E.

Options to be exercised within four (4) years of main delivery/delivery of base quantity of each model/configuration, cf. Annex C.

## 3 Consumables, Spare Parts and Tools

The main delivery includes necessary consumables, tools and spare parts as specified by the Contractor to ensure safe and efficient assembly, use, handling and maintenance of the Work Stands.

Pursuant to the Contract Provisions clause 2.3 shall maintain the capacity to provide supplemental spare parts for a minimum of five (5) years after base and optional deliveries.

## 4 Documentation

The Work Stands shall be delivered with necessary documentation, including but not limited to, assembly, user and maintenance manuals, drawings and diagrams, parts catalogue, Certificate of Conformity, and CE-labeling. Please refer to Annex E for exhaustive specification of documentation.

## 5 Services

The Contractor shall provide necessary on-site training for assembly, use, handling and maintenance of the Work Stands as well as necessary detailed form-fitting of the Work Stands to ensure optimal usability.
