1. Tender documents

1.1 Introduction

1.1.1 About the buyer

The Norwegian University of Life Sciences NMBU (organization no. 969 159 570) has a special responsibility to carry out research and education that secures the livelihood of future generations. We deliver knowledge for life, and sustainability is rooted in everything we do. NMBU has 1800 employees and 6275 students and is organized in seven faculties. NMBU also has a research center in Sandnes.

In line with NMBU's ethical guidelines, the university demands that the UN's human rights and the ILO's core conventions are fulfilled throughout the value chain that is affected by an acquisition. NMBU emphasizes having a sustainability perspective - also in procurement processes, and is a member of Ethical Trade Norway.

Further information about us can be found on [NMBU's website](#)

1.1.2 The Procurement Objective and Scope

NMBU wishes to procure a Isotope Ratio Mass Spectrometry System (IRMS) with Elemental Analyzer and Trace Gas Preparation System.

The value of the acquisition is estimated to be over the EEA threshold value.

For further information, please see the procurement documents.

1.1.3 Subcontracts

It is not permitted to bid on parts of the tender. The buyer has considered dividing the assignment in accordance with FOA §19-4, and has concluded that it is not appropriate for this procurement. This is based on the volume and nature of the procurement.

The buyer reserves the right to accept the whole or part of the bid.

1.1.4 Alternative bids

Submittal of alternative bids is not accepted.

1.1.5 Time frame and deadlines

The procurement is planned conducted according to the following time frame. All deadlines after the bid submission deadline are tentative.

Activities	Dates and time
Deadline for submitting questions and queries about the tender documents.	13.10.2026
Bid submission deadline	19.10.2026 12:00
Contract award	23.10.2026
Standstill period	10 days, after contract award
Signing of contract	After standstill period

1.1.6 Type of contract

Contract

The procurement will be regulated by the attached contract with appendices.

The Buyer expects the Tenderers to read the contract and make the necessary clarifications internally so that he is ready to sign the contract if he is awarded a contract.

The Buyer expects the Tenderers to read the contract provisions and make the necessary clarifications internally so he is ready to sign the contract if awarded.

The contract will be completed in collaboration with the winner of the competition, based on the tender document and offer.

The contract will be signed electronically by the awarded Tenderer.

a. Any reservations to the contract can be stated here

Fritekst

Del I+III Åpen ...

b. The Tenderer confirms that the contract terms have been read

Ja/Nei. Ja kreves

Del I+III Åpen ...

1.1.7 Validity period

The Tenderer's bid shall be valid until 19.11.2026. It is not allowed to withdraw the bid after the bid submission deadline.

The Tenderer accept the bid validity period

Ja/Nei. [Ja kreves](#)

Del I+III Åpen ...

1.1.8 Questions regarding the tender document

Any questions the Tenderer may have regarding the tender document must be submitted within the deadline specified in section 1.1.5.

Questions shall be submitted in this portal (hereby: "TendSign"). All questions will be anonymized when answered and subsequently made available within reasonable time prior to the bid submission deadline for everyone registered in TendSign.

There must be no communication regarding the tender with any other persons within the buying organization than the person responsible for this procurement.

1.2 Procurement procedure and demands

1.2.1 Procurement procedure

This procurement is carried out in accordance with the Norwegian Law of 17 June 2016 no. 73 on Public Procurements (LOA) and Regulation of 12 August 2016 no. 974 on Public Procurements (FOA), as well as the provisions set out in this tender documents.

The procurement is carried out as an open procedure in accordance with FOA part I and III. This procedure allows all interested Tenderers to submit a bid.

Negotiations are not allowed.

The procurement has been announced in the DOFFIN and TED databases.

1.2.2 Method of delivery

The offer must be delivered through the supplier portal (TendSign). Any attachments must be loaded into TendSign before bid submission deadline.

Bids that have not been submitted via TendSign will be rejected.

Bids can be withdrawn, revised and resubmitted until the bid submission deadline.

Tenderers must respond in the response boxes in TendSign. The answers must be clear and distinct.

Attachments shall normally be uploaded in PDF format. Zip files are not allowed, unless otherwise stated.

Significant deviations may result in rejection of the bid.

1.2.3 Bid submission deadline

The bid submission deadline is stated on the front page of the TendSign, and will be 19.10.2026 12:00

After this date and time, TendSign will be closed and it will no longer be possible to deliver bids.

1.2.4 Confidentiality and public access

The Buyer organization and its employees are obliged to prevent others from gaining access to or knowledge of information about technical facilities and procedures or operating and business matters that it will be of competitive importance to keep secret, cf. FOA § 7-4, cf. the Public Administration Act § 13.

Pursuant to section 23 (3) of the Public Administration Act, the procurement protocol and the bids in the tender are protected from public access until the choice of supplier has been notified to the Tenderers.

Thereafter, these documents are basically open for inspection. However, the Buyer has a duty of confidentiality regarding information about technical facilities and procedures or operational and business matters that it will be of competitive importance to keep secret (business secrets), cf. the Public Administration Act § 13.

It is the Buyer's responsibility to assess which information is covered by the duty of confidentiality. In this assessment, the Buyer will consider the Tenderer's views with regard to what is considered to be business secrets.

a. If a competing company requests access to your bid, please state what is considered to be business secrets / confidential information

Fritekst

Del I+III Åpen ...

b. The Tenderer can submit a censored version of the bid here

Vedlagt fil

Del I+III Åpen ...

1.2.5 Reservations and deviations

Substantial reservations and deviations from the tender documents will result in the bid being rejected.

Reservations and deviations shall be clear and distinct, so that the Buyer can evaluate the bids without contacting the Tenderers. Reservations and deviations shall clearly and unambiguously refer to the relevant annex and section in the tender document.

The Tenderer shall clearly specify what the consequences the reservations or deviations will have for the performance, price and/or other aspects of the bid.

The Tenderer shall state whether the bid contains reservations or deviations here.

Fritekst

Del I+III Åpen ...

1.2.6 Corrections, supplements and/or amendments to the tender documents

Prior to the bid submission deadline, the Buyer has the right to make non-substantial corrections, supplements or amendments to the tender documents.

Any corrections, supplements and/or amendments to the tender documents will be published no later than 6 days prior to the bid submission deadline.

1.2.7 Evaluation

The contract is awarded on the basis of which bid has the best price-quality ratio. The evaluation is based on the award criteria stated in the tender documents.

Price evaluation: The price is evaluated using a proportionately scale, where the lowest price gives maximum price points.

Evaluation of other award criteria: The evaluation of these criteria is based on an overall assessment

related to the award criteria.

The bid that is considered best for each criterion achieves maximum points. The other bids receive points based on how the individual bid appears in relation to the best bid, according to the Buyer's professional judgement.

2. Qualification

2.1 European single procurement document (ESPD)

2.1.1 Generally about ESPD

As a preliminary documentation on fulfillment of qualification requirements, that there are no grounds for rejection and possible fulfillment of selection criteria, the Tenderer must fill in the attached ESPD form. The form must be submitted together with the offer. The Tenderer or Tenderers who are awarded a contract must, before entering into a contract, document fulfillment of the qualification requirements in accordance with the stated documentation requirements.

2.1.2 General statement for all qualification requirements in the ESPD form

In this tender, the Tenderers can give an overall declaration that he meets all of the qualification requirements stated in the tender document in the ESPD form. This is done in the part IV, section a.

2.1.3 Purely national exclusion grounds

In accordance with part III of the ESPD: Grounds for exclusion, section D: 'Other grounds for exclusion that are laid down in the national legislation of the Buyer's member state'. The Norwegian procurement rules go beyond the grounds for exclusion stated in the EU directive on public procurement and in the standard ESPD form. All the grounds for exclusion contained in FOA section 24-2 are applicable to this competitive tender, including the grounds for exclusion that are purely national.

The following of the grounds for exclusion in the Procurement Regulations § 24-2 are purely national grounds for exclusion:

§24-2 (2). This provision states that the Buyer shall exclude a Tenderer when he is aware that the Tenderer has been legally convicted or has adopted a fine for the specified criminal offenses. The requirement that the Buyer must exclude Tenderers who have adopted fines for the specified criminal offenses is a special Norwegian requirement.

§24-2 (3) letter i. The reason for exclusion in the ESPD form only applies to serious errors in professional practice, while the Norwegian reason for exclusion also includes other serious errors that may lead to doubts about the Tenderer's professional integrity.

2.2 Qualification requirements

To be able to have their tender evaluated, the Tenderer must fill out the European Single Procurement Document (ESPD) to substantiate that he fulfils all of the qualification requirements listed below. The Tenderer may do this by filling out the ESPD-form electronically in the TendSign portal.

Before signing the contract, the Tenderer being awarded the contract must document that the qualification requirements are met in accordance with the listed documentation requirements. The Tenderers must have the documentation available and must be prepared to present the documentation on short notice at any time during the tender process.

Tenderers who do not meet the qualification requirements shall be excluded from the tender, cf. FOA §24-2 (1).

3. Requirements and award criteria

3.1 Requirement specification

Purpose and Scope

The Norwegian University of Life Sciences (NMBU), Faculty of Environmental Sciences and Natural Resource Management (MINA), intends to procure a continuous-flow Isotope Ratio Mass Spectrometry (IRMS) system with two additional modules: one for isotope analysis of solid samples and one for isotope analysis of trace gases.

The proposed system may be delivered either as a single integrated platform from one supplier or as a combination of a new isotope ratio mass spectrometer and elemental analyzer integrated with the University's existing Thermo Finnigan Precon module (DELTA/MAT 252). In the latter case, the supplier shall be responsible for integrating the Precon module into the analytical workflow, including communication between instruments, method setup, validation, user training, warranty obligations, and post-installation technical support.

Equivalent technical solutions will be accepted, provided that they fulfil the intended analytical purpose and meet the acceptance criteria. All requirements shall be interpreted as functional and performance-based requirements.

The delivery shall additionally include:

A complete system configuration, including all hardware, software, licenses, cables, interface modules, gas lines supplied by the supplier, sample trays/racks, start-up consumables, and spare parts required for installation and acceptance testing.

Installation, commissioning, and user training.

Technical documentation and acceptance testing required for routine stable isotope analysis.

An extended warranty (2 years) as an option.

Delivery DDP Ås, Norway (Incoterms® 2020).

3.2 Minimum Requirements

Mandatory minimum requirements are requirements that must be fulfilled.

The proposed system shall comply with all requirements listed under. Tenders that do not satisfy all mandatory minimum requirements will be rejected.

a. ISOTOPE RATIO MASS SPECTROMETER

Del I+III Åpen ...

Magnetic sector IRMS suitable for continuous-flow analysis of stable isotope ratios.

Seamless integration of the proposed peripheral units (elemental analyzer and trace gas preconcentration system) in a continuous-flow configuration.

Vacuum system with backing pump and turbomolecular pump(s), including protection and shutdown functions in the event of vacuum failure or power outages.

The ion source and analyzer shall be suitable for the analysis of CO₂, N₂, H₂/HD, N₂O, and CH₄-derived CO₂, or for an explicitly specified subset thereof in the proposed configuration.

Adjustment of the ion source, source parameters, vacuum status, and detector signals shall be controllable through the instrument software.

The system shall include procedures for automatic tuning, linearity testing, stability testing, and H₃⁺ correction, where applicable.

The collector, amplifier, resistor filter, and/or ion-optical configuration shall support validated isotope ratio measurements for at least the following gases and masses:

-CO₂ using m/z 44, 45, and 46

-N₂ using m/z 28 and 29

-H₂/HD using m/z 2 and 3, with documented correction for and suppression of relevant helium or isobaric interferences

-Nitrogen and oxygen isotope ratio measurements in N₂O using m/z 44, 45, and 46.

Ja/Nei. Ja kreves

Leverandørkommentar tillatt

b. GAS INTERFACE

Del I+III Åpen ...

The system shall include a continuous-flow interface connecting the peripheral units to the IRMS.

The interfaces shall also enable the introduction of reference gases.

The gas interfaces shall support software-controlled dilution of sample and/or reference gases where necessary to maintain signal intensities within validated linear operating ranges.

Ja/Nei. Ja kreves

Leverandørkommentar tillatt

c. ELEMENTAL ANALYZER

Del I+III Åpen ...

The system shall include an elemental analyzer for stable isotope analysis of carbon and nitrogen in solid samples based on complete combustion by means of flash combustion, followed by oxidation and reduction to CO₂ and N₂, respectively.

Furnace/reactor temperatures, gas flows, and sample introduction shall be software-controlled. The supplier shall document the furnace/reactor design and maximum operating temperatures.

The system shall include an autosampler for solid samples ("low-blank" or "zero-blank"), suitable for unattended operation, with a minimum of 32 sample positions.

The system shall include a thermal conductivity detector (TCD) or equivalent detector for the quantification of N₂ and CO₂ following chromatographic separation.

The system shall include water removal and other gas purification components required for stable isotope analysis of carbon and nitrogen.

The supplier shall guarantee and verify the following precision during acceptance testing using homogeneous solid standards:

$\delta^{13}\text{C}$ in CO₂: ≤ 0.10 ‰ (1 σ) or better

$\delta^{15}\text{N}$ from N₂: ≤ 0.20 ‰ (1 σ) or better

The software workflow between the EA and the IRMS shall support synchronized sample sequences, transfer of relevant sample information, and integrated data processing from raw signals to isotope ratio results.

Ja/Nei. Ja kreves

Leverandørkommentar tillatt

d. GAS PRECONCENTRATION SYSTEM

Del I+III Åpen ...

In the event that a supplier is unable to offer a gas preconcentration system, we will accept proposals that integrate our existing Precon (DELTA/MAT 252) system, provided that the supplier includes all integration costs in the proposal and assumes responsibility for delivering a fully functional system integration with an approved final acceptance test. In this case, we require a detailed technical integration plan and acceptance testing procedure.

The solution shall support isotope analysis of CO₂, CH₄, and N₂O at atmospheric concentrations.

The solution shall support $\delta^{13}\text{C}$ analysis of CH₄ through combustion or another validated conversion to CO₂.

The solution shall support isotope analysis of N₂O through simultaneous analysis of $\delta^{15}\text{N}$ and $\delta^{18}\text{O}$.

Documented precision at atmospheric concentrations:

$\delta^{13}\text{C-CO}_2: \leq 0.5 \text{ ‰ (1}\sigma\text{)}$

$\delta^{13}\text{C-CH}_4: \leq 0.5 \text{ ‰ (1}\sigma\text{)}$

$\delta^{15}\text{N-N}_2\text{O}: \leq 0.5 \text{ ‰ (1}\sigma\text{)}$

$\delta^{18}\text{O-N}_2\text{O}: \leq 1.0 \text{ ‰ (1}\sigma\text{)}$

The proposal should include an autosampler (AS) with a "double-needle" system for helium flushing of septum vials. The working area shall be a minimum of 800 cm² and support programmable positions.

The autosampler must be controllable through a common user interface.

Ja/Nei

Leverandørkommentar tillatt

e. COMPUTER, SOFTWARE AND DATA MANAGEMENT

Del I+III Åpen ...

The proposal shall include a computer/workstation suitable for the supplied system.

All instrument software and ancillary software required for data acquisition, instrument control, data processing, calibration, data export, and diagnostics shall be included in the proposal.

The software shall provide integrated control of the IRMS and the proposed peripheral units, sufficient for unattended operation.

The software shall support user-defined methods, calibration using standards, quality control, data export in open/common formats, and backup of methods and analytical results.

All software and driver installation files, together with installation and configuration documentation, shall be made available to the customer to enable the setup of a replacement computer in the event of computer failure outside the warranty period.

The supplier shall specify operating system requirements, licensing restrictions, software update policies, cybersecurity requirements, and whether internet access is required for installation, operation, updates, or training.

Ja/Nei. Ja kreves

Leverandørkommentar tillatt

f. ELECTRICAL REQUIREMENTS

Del I+III Åpen ...

All instruments and accessory modules shall be compatible with a 230 V IT electrical system, single-phase or three-phase, or be supplied with the necessary transformers/adapters included in the proposal.

Ja/Nei. Ja kreves

Leverandørkommentar tillatt

g. COMMISSIONING

Del I+III Åpen ...

The delivery shall include installation, commissioning, and on-site acceptance testing performed by qualified personnel.

An acceptance test shall be included, covering verification of precision and linearity for IRMS reference and monitoring gases.

- $\delta^{13}\text{C}$ and $\delta^{15}\text{N}$ precision for homogeneous solid materials $\delta^{13}\text{C}\text{-CH}_4$, $\delta^{15}\text{N}\text{-N}_2\text{O}$, and $\delta^{18}\text{O}\text{-N}_2\text{O}$ at atmospheric concentrations.
- Verification of switching between peripheral units.
- Procedures for data export, backup, and recovery.

3.3 Award criterias quality (20%)

The tenderer is encouraged to provide detailed descriptions of the analytical workflows, performance specifications, and the acceptance testing procedure included in the offered solution. Any appendices submitted shall contain only the information requested. The solution will be evaluated based on the following:

a. Understanding of the Requirements, including descriptions of:

Del I+III Åpen ...

Mass ranges, definition of mass resolution, and relevant collector configurations.

Amplifier range, resistor configuration, and any capability for automatic gain switching.

Pump type, number of pumps, backing pump requirements, and protection of the ion source and analyzer.

Sample containers, sample volumes, septum vials, minimum sample volume, and any limitations associated with the supported sample preparation procedures.

Analytical performance for CH₄ and N₂O analysis at ambient/background concentrations, including precision, assumptions regarding sample volume/concentration, and calibration strategy.

Design of the acceptance test procedure.

Instrument Performance Beyond the Minimum Requirements, including:

IRMS:

A wider dynamic range and automatic switching of amplification/resistance values. Larger autosampler capacity.

Automatic tuning, stability checks, linearity checks, and determination of the H₃⁺ factor. Automatic protection of the ion source/analyzer in the event of power failure. Available functions for automatic standby, startup, leak testing, auto-stop, and shutdown. Flexibility for future accessory modules or additional isotope analysis systems.

Peripheral Interfaces:

Multiple permanently connected reference/monitoring gases. Gas-saving standby/idle modes and automatic startup and conditioning procedures. Capability to connect additional peripheral units with both high and low gas flow rates.

Gas Preconcentration:

Larger autosampler capacity. Capability for flexible or programmable tray positions for custom sample racks. Capability for automatic filling/pumping solutions for liquid nitrogen, including a compatible Dewar vessel and a safe handling solution. Minimal need for manual operations between CH₄, N₂O, and CO₂ workflows.

Software:

Availability of an application programming interface (API). Easy export of raw and processed data.

Del I+III Åpen ...

c. Preference will be given to suppliers who:

Del I+III Åpen ...

Offer comprehensive technical support and provide rapid response times for online support. Offer favorable terms for on-site support when required. Provide robust warranty arrangements. Ensure rapid delivery of spare parts when needed. Offer additional application training for trace gas workflows.

The supplier is requested to describe and specify its proposed solution in this regard, including maximum response times for different types of support, preventive maintenance solutions, availability of spare parts, and the training included in the proposal.

Fritekst

d. The Contracting Authority seeks to minimize requirements for electrical connections, power consumption, heat output, cooling requirements, compressed air, gases, liquid nitrogen, exhaust/ventilation systems, instrument dimensions, and the required clearance space around the equipment.

Del I+III Åpen ...

The tenderer is encouraged to specify the requirements of the proposed solution in relation to these aspects.

Fritekst

e. Evaluation offered solution

Lineær skala. 0 - 10 points

Del I+III Åpen ...

20 p.

3.4 Award criterias climate and environment (30%)

The tenderer is encouraged to provide detailed descriptions for the offered solution. Any appendices submitted shall contain only the information requested. The solution will be evaluated based on the following:

a. The systems technical service life (in years) under normal use. Number of key components that can be maintained or replaced without replacing the entire system.

Del I+III Åpen ...

Availability of spare parts (in years) after delivery.

Service and repair options throughout the expected service life of the equipment.

Packaging types and their recycling rates.

Helium-saving modes, and the ability to disable or adjust helium-saving functions during method development.

Power consumption and heat generation.

Noise level.

3.5 Award criterias price (50%)**Price**

Del I+III Åpen ...

The total price shall be stated in NOK excluding VAT and shall include all costs associated with the delivery of the proposed solution, including all necessary equipment, software, licenses, installation, commissioning, acceptance testing, training, documentation, packaging, transportation, delivery DDP Ås, and any other applicable charges, fees, duties, and taxes.

Prismatrise. 2 rader

Leverandørkommentar tillatt

Spesifikasjon	Kvantitet	Enhet	Pris per enhet (NOK)
Total price, IRMS-system	1	piece	
Price for optional extended warranty (2 years) in NOK excluding VAT.	1	piece	

3.6 Evaluation

Contract award will be based on the tender representing the best combination of price and the other award criteria.

The award criteria set out in the procurement documents will form the basis of the evaluation.

Price evaluation: The tender with the lowest price will receive the maximum score.

Evaluation of the other award criteria: The evaluation of the criteria will be based on an overall assessment, taking into account the factors specified under each award criterion.

The tender considered to be the best for a given criterion will receive the maximum score. The remaining tenders will be awarded scores based on a discretionary assessment of how each tender compares to the best tender.

The award criteria will be weighted as follows in the evaluation:

Price: 50%

Climate and environment: 30%

Quality: 20%

Part VI: Concluding statements

Concluding statements

The undersigned formally declare that the information stated under Parts II - V above is accurate and correct and that it has been set out in full awareness of the consequences of serious misrepresentation.

The undersigned formally declare to be able, upon request and without delay, to provide the certificates and other forms of documentary evidence referred to, except where:

a) The contracting authority or contracting entity has the possibility of obtaining the supporting documentation concerned directly by accessing a national database in any Member State that is available free of charge (on condition that the economic operator has provided the necessary information (web address, issuing authority or body, precise reference of the documentation) allowing the contracting authority or contracting entity to do so. Where required, this must be accompanied by the relevant consent to such access), or

b) As of 18 October 2018 at the latest (depending on the national implementation of the second subparagraph of Article 59(5) of Directive 2014/24/EU), the contracting authority or contracting entity already possesses the documentation concerned.

The undersigned formally consent to Norges miljø- og biovitenskapelige universitet, gaining access to documents supporting the information, which has been provided in this European Single Procurement Document for the purposes of 26/04883 Isotope Ratio Mass Spectrometry System (IRMS).

Date, place and, where required or necessary, signature(s):

This document is covered by the suppliers electronic signature of the tender.
